## MAIN FEATURES

### EMPLOYMENT

States' trend series  
comparisons

The Australian and State *trend series* comparisons are given on page 25. There was an increase of 2.5% in Tasmania's employment over the year to February 1996. The largest percentage increase in employment was in New South Wales (3.2%). The next highest percentage increase in employment was in Victoria (2.8%), followed by Queensland (2.3%) and South Australia (1.1%). Western Australia had an increase in employment of 0.8%.

Regional Tasmania's original  
series figures

In the Hobart and Southern Statistical Division the estimate of *unadjusted* employment increased by 2,100 between December 1994 and December 1995 to 102,300. Employment in the Northern Statistical Division increased by 6,100 between December 1994 and December 1995 to 59,300. The estimate of employment in the Mersey-Lyell Statistical Division was 44,300 in December 1995, a decrease of 1,100 on the figure for December 1994.

(See tables 3-8, pages 2-7.)

### UNEMPLOYMENT

Tasmania's trend series  
figures

The Tasmanian provisional *trend series* estimate of 22,500 unemployed persons in February 1996 was a decrease of 1,800 on the figure for February 1995 of 24,300. The estimate of the unemployment rate of 10.0% in February 1996 compared with 10.9% in February 1995.

(See tables 3-8, pages 2-7.)

### THE LABOUR FORCE

Tasmania's trend series  
figures

In February 1996 there was an *unadjusted* estimate of 368,200 civilian Tasmanians aged 15 or more. There were an estimated 225,100 persons (based on *trend series* estimates) in the labour force. The estimate of the labour force participation rate in February 1996 was 61.1%, compared with 60.5% in February 1995.

### Tasmania Unemployment

For males, the estimate of the participation rate was 71.6%, compared with 71.4% for February 1995. For females, the estimate of the participation rate was 51.0 %, compared with 49.9% in February 1995.

(See table 3, page 2.)

### EMPLOYED WAGE AND SALARY EARNERS

In March 1995 there were approximately 137,600 employed wage and salary earners in Tasmania. In March 1993 the figure was 147,100 employed wage and salary earners.

In February 1995 the Tasmanian public sector accounted for 31.7% of all employed wage and salary earners. Overall, the category Community services had the highest industry representation (27.8%, compared with the equivalent figure of 24.9% recorded in February 1993). The next highest industry grouping was Wholesale trade and Retail trade (19.4%, compared with 20.8% in February 1993) and Manufacturing (15.2%, compared with 14.8% in February 1993).

In February 1995, women made up 45.5% of employed wage and salary earners. In February 1993, the equivalent figure was 44.8%.

(See table 9, page 8.)

### AWARD RATES OF PAY INDEXES

The annual movement from January 1995 to January 1996 of weekly award rates of pay indexes for Tasmania rose by 1.4% for full-time adult females and by 1.4% for full-time adult males, for a combined annual increase of 1.4%. For Australia, the figures were 1.5% for females and 1.2% for males, for a combined annual increase of 1.3%.

For full-time adult female employees in Tasmania, the largest industry increases over this 12 month period occurred in the Manufacturing industry (4.0% per cent); and the Recreation, personal and other services industry (2.3%).

For the same period for full-time adult male employees in Tasmania, the largest industry increases occurred in the Transport and storage industry (3.2%); and the Public administration and defence industry (2.3%).

The largest occupation increase over the same period for full-time adult female employees occurred in Tradespersons (3.7%); and Plant and machine operators, and drivers (3.2%).

For full-time adult male employees the largest occupation increases over the period occurred in Plant and machine operators, and drivers (2.1%); and Salespersons and personal services workers (1.9%).

(See table 14, page 10.)

## HOUSE PRICE INDEXES

The price index for established houses in Hobart fell by 0.1% in the December quarter 1995. Falls also occurred in Adelaide, Sydney and Perth, while small increases occurred in Darwin, Canberra and Melbourne.

The Australian index fell by 0.2% for the quarter, but for the year to December 1995 rose by 0.3%.

The price index for project homes in Hobart remained steady in the December quarter 1995, while the national average fell by 0.2%.

*House Price Index: Eight Capital Cities, December quarter 1996, ABS catalogue number 6416.0, released on 7 March 1996, \$13.00*

## BUILDING MATERIALS PRICE INDEXES

Prices for house building materials in Hobart rose by 0.3% during January 1996, which was the highest increase of any State capital for the month. For the twelve months ending January 1996, prices in Hobart increased by 3.2% per cent, which was also the highest increase for any State over that period. Falls were recorded in Melbourne, Brisbane and Adelaide, while the Australian index remained unchanged from that of January 1995.

For materials used in other than house building, the price index in Hobart increased by 0.2%, during January 1996, and by 2.9% for the year ending January. The only higher increase recorded for the year was in Perth, at 3.0%.

Components which registered the most change in Hobart over the year to January were pre-cast concrete products (up 6.4%), structural steel (up 5.0%) and non-ferrous pipes and fittings (down 6.8%).

*Price Index of Materials Used in House Building, January 1996, ABS catalogue number 6408.0, released on 8 March 1996, \$13.00*  
*Price Index of Materials Used in Building Other than House Building, January 1995, ABS catalogue number 6407.0, released on 8 March 1996, \$15.00*

## HOUSING FINANCE

The trend estimate of the number of secured housing finance commitments entered into in Tasmania in January 1996 fell 2.1% on the previous month to 942. This is the third successive monthly fall, following the peak figure of 1,013 in September 1995.

However, the national trend estimate for January rose by 0.2% to 38,354, representing the ninth consecutive month of increase since April 1995.

In the twelve months ended January 1996, the Tasmanian trend estimate for the number of commitments rose 4.2%, from 904 to 942. This was a smaller increase than the Australian trend estimate, which rose 6.1%, from 36,148 to 38,354.

*Housing Finance for Owner Occupation*, January 1996, ABS catalogue number 5609.0, released on 13 March 1996, \$14.00

## LIVESTOCK SLAUGHTERING

**Trend estimates** The January 1996 Tasmanian trend estimate for the slaughtering of cattle and calves was 1.2% lower than that recorded in December 1995. The number of pigs slaughtered in the same period increased by 1.3% while the number of sheep and lambs slaughtered increased by 2.3%.

The trend estimate for slaughtering sheep and lambs was 75,000 in January 1996, which was 11.9% below the 85,100 recorded in January 1995. The slaughtering of sheep and lambs continued to increase from a low of 69,300 in August 1995.

The trend estimate of 7,000 pigs slaughtered in January 1996 was 10.3% below the 7,800 slaughtered in January 1995. The number of pigs slaughtered has continued to increase from the low point of 6,900 in October 1995.

The cattle and calves slaughtering trend estimate continued its decline of recent months. The number of cattle and calves slaughtered in January 1996 was 19,400, which was 8.1% below the 21,100 recorded in January 1995.  
(See table 21, page 16.)

## BUILDING APPROVALS

There were 227 new dwelling units approved during January 1996 in Tasmania. This was an increase of 4% on the number recorded for December 1995 (219) and also a 4% increase on the number recorded for January 1995 (218).

For the twelve months ended January 1996 there were 2,766 new dwelling units approved, 23% below the 3,576 units recorded for the twelve months ended January 1995.

The highest number of dwelling units approved in January 1996 was recorded by the City of Hobart with 71, followed by the City of Launceston with 16, the Municipality of Central Coast with 14 and the Municipality of Circular Head with 11.

The value of all building approved, at current prices, in January 1996 was \$69.2 million, 97% above the December 1995 figure of \$35.0 million and 104% above the January 1995 figure of \$33.9 million.  
(See table 27, page 20.)

## RETAIL

The trend estimate for turnover of retail and selected service establishments for January 1996, in Tasmania, was \$244.5 million, an increase of 6% on the January 1995 figure of \$230.1 million. The trend estimate for Tasmania has shown a slight increase over the last five months.

The trend estimate of turnover for January 1996, for Australia (\$10,102.6 million), was 8% higher than for January 1995 (\$9,332.6 million). The trend estimate of retail turnover increased by 0.4% between December 1995 and January 1996.

In original terms, the estimate of retail turnover in January 1996, for Tasmania, was \$213.2 million, 10% above the figure recorded for January 1995 (\$220.9 million).

*(See table 35, page 24.)*

#### NEW MOTOR VEHICLE REGISTRATIONS

There were 871 new motor vehicles (excluding motorcycles) registered in Tasmania during January 1996. This was 50% below the 1,734 registered in December 1995 and 1% below the figure for January 1995 (879).

*(See table 34, page 24.)*

December	19.9	18.6	109.1	706	2 525

<sup>1</sup> Source: Australian Dairy Corporation.

<sup>2</sup> Changing productivity per staff-hour makes these indicators unsatisfactory for long-term comparisons.

<sup>3</sup> Metallurgical refining index (Base: 1979-80 = 100.0) Output from selected establishments covering the smelting and refining of ferro-alloys, zinc and aluminium. The weighting pattern is based on the establishments' value added as derived from the 1979-80 Manufacturing Census. For multi-product establishments, value added was apportioned to products on the basis of gross receipts from each product.

<sup>4</sup> Includes the whole milk equivalent of farm cream intake.

<sup>5</sup> Includes butter equivalent of butter oil.

<sup>6</sup> Includes spinning, weaving and carpet making. Reported by establishments which manufacture textiles only, or manufacture clothing and textiles in the one plant.

<sup>7</sup> Excludes production of directory newsprint and high grade specialty paper.

## EXPLANATORY NOTES

### INTRODUCTION

1 This publication contains latest figures for a comprehensive range of economic indicators. Statistics shown in this publication are the latest available at the date of preparation and may be subject to revision in subsequent issues. In a number of cases figures appearing in this publication are preliminary and are subject to revision in subsequent issues. Reference should therefore always be made to the latest issue or to the statistical publication on the specific subject.

### SEASONAL ADJUSTMENT AND TREND ESTIMATION

2 Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences on the series can be more clearly recognised. Seasonal adjustment does not aim to remove the irregular or non-seasonal influences which may be present in any particular month. This means that month-to-month movements of the seasonally adjusted estimates may not be reliable indicators of trend behaviour.

3 The smoothing of seasonally adjusted series reduces the impact of the irregular components of the seasonally adjusted series and creates trend estimates. These trend estimates are derived by applying a 13-term Henderson-weighted moving average to all months except the last six. The last six monthly trend estimates are obtained by applying surrogates of the Henderson average to the seasonally adjusted series. Trend series are used to analyse the underlying behaviour of the series over time.

4 While this smoothing technique enables estimates to be produced for the latest month, it does result in revisions to the most recent months as additional observations become available. Generally, subsequent revisions become smaller and after 3 months have a negligible impact on the series. Revisions also occur as a result of the annual review of seasonal factors.

5 Users may wish to refer to the ABS Publication *A Guide to Interpreting Time Series – Monitoring 'Trends' – An Overview* (1348.0) for more detailed information on smoothing seasonally adjusted time series data.

### RELATED PUBLICATIONS

6 Current publications produced by the ABS are listed in the *Catalogue of Publications and Products* (1101.0). The ABS also issues, on Tuesdays and Fridays, the *Release Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and *Release Advice* are available from any ABS office.

### UNPUBLISHED STATISTICS

7 As well as the statistics included in this and related publications, the ABS may have other relevant unpublished data available. Inquiries should be made to Information Inquiries on (002) 20 5800 or to any ABS office.

### EFFECTS OF ROUNDING

8 Some figures have been rounded and discrepancies may occur between totals and sums of the component items.

### SYMBOLS AND OTHER USAGES

n.a.	not available
n.y.a.	not yet available
..	not applicable
—	nil or rounded to zero
p	preliminary—figure or series subject to revision
r	figure or series revised since previous issue
